SUMMARY

Third-semester Computer Science Engineering student at R V College of Engineering with strong foundations in systems programming, computer architecture, and applied machine learning. Experienced in literature surveys, rigorous research methodologies, and version control workflows. Built an original chess engine and contributed hardware testing to Leela Chess Zero.

EDUCATION

B.E. in Computer Science Engineering 08/2025 - Present
R V College Of Engineering — Bangalore, India

- Currently in 3rd Semester. Relevant Coursework: Data Structures, Algorithms, Computer Organization.

12th Boards (CBSE, PCMB) 04/2025
Narayana E Techno Whitefield — Bangalore, India

PROJECTS & CONTRIBUTIONS

Custom Chess Engine Development Completed

- Engineered a fully functional chess engine from scratch, utilizing Eddie Sharick's tutorial as a structural foundation and independently implementing advanced search and evaluation features.
- Conducted literature surveys on alpha-beta pruning and evaluation heuristics to optimize move generation efficiency.

Diagnosis Of Age-Related Macular Degeneration 2nd Sem EL Project

- Developed a medical image diagnosis tool using deep learning and computer vision techniques, with model training workflows on Kaggle.

Arduino-Based ASNS Irrigation System 1st Sem EL Project

- Designed and implemented an automated sensor-based microcontroller hardware system.

Leela Chess Zero & Stockfish Community Contributions

- Remote hardware contributor to Leela Chess Zero for distributed training and evaluation testing.
- Active technical participant on the Stockfish Discord server.

COURSEWORK & CERTIFICATIONS

- **Nand2Tetris (Part 1 & Part 2):** Built a complete general-purpose computer system from logic gates up to an assembler, virtual machine, and compiler.
- **MIT 6.S191 (2025):** Deep Learning.
- **Python Bootcamps:** The Complete Python Bootcamp; Python for Data Structures, Algorithms, and Interviews (Jose Portilla).

TECHNICAL SKILLS

Languages:	Java, Python, C
Core:	Digital Logic Design, Systems Architecture
ML/AI:	Deep Learning Frameworks, Kaggle Training
Version Control:	Git, GitHub
Research:	Literature Surveys & Idea Formulation
Domain:	Chess Engine Development

ACTIVITIES & ELECTIVES

- **College Chess Team Member:** Filled in for first-team players and contributed to 2 tournament victories.
- **Electives:** Java, Electronics, Electrical.
- **Sports:** Competitive Swimming.
